Using a working set limited to 900 pages and 36 pages of data storage (excluding image)

Total number object records read (both passes):   254
    of which 69 were in libraries and 2 were DEBUG data records containing 76 bytes

Number of modules extracted explicitly              = 1
    with 1 extracted to resolve undefined symbols

1 library searches were for symbols not in the library searched

A total of 6 global symbol table records was written
